

## Portable 3-Knife Trimmers

3-Knife Trim Solutions for Professional Quality Finishing

**ROSBACK**

## Performance & Finishing Features

Designed for runs of hundreds and thousands... built for thousands of runs.

Heavy-Duty Rosback 3-knife trimmers are the most accurate in the industry. Each knife has its own built-in clamp that assures a square 3-edge trim. Several 3-knife trimmer models are available to go in-line with Rosback Binding Systems or any other book binding system. Off-line trimmers are also available.

These heavy-duty, portable, self powered trimmers roll up to virtually any booklet making machine. Avoid the added time, cost and problems associated with guillotining books off-line. The result... perfectly trimmed books ready for your on-demand customers.

The 253 Trimmer is the newest edition. This trimmer is compact, affordable and features the fastest setup in the industry.

### PERFORMANCE FEATURES:

- 3-Knife Scissor Action
- Built-In Clamp for Accurate Trims
- Specially Designed Book Transport
- Adjustable In-Feed Section
