

SINGLE-CLAMP HOT-MELT PERFECT BINDER/PADDER

850 Perfect Binders

ROBBACK

The model 850 Perfect Binder/Padder lets you select the level of automation to match your bindery needs and is ideal for the short-run, on-demand market. It's also easy for one person to operate.

Select an 850 model with an auto-clamp, auto-nip, milling, vibrating jogger or fume and chip exhaust. Or choose any combination of those features. Whatever your exact configuration, the 850 binds up to 200 books per hour with or without a cover.

The 850's simple heavy-duty clamp adjusts from 4 sheets up to 2-inch thick spines in seconds. In-line notching allows glue to penetrate the spine for strong binds. Flip one switch to turn notching off and produce pads with equal efficiency.

The 850's precise cover nipper automatically adjusts to book thicknesses producing square tight book spines up to 15 inches long. The 850 comes with side gluing and plugs into 120 volt circuits.

Affordable, reliable, easy semi-automatic operation - the Rosback 850 can be the exact perfect binder you need to create long profits on short runs.

STATE-OF-THE-ART FEATURES:

- Quick setup/changeover for short-run, on-demand publications.
- Safe, smokeless, odorless operation requires little adjustment.
- Precision nipper automatically senses and adjusts to book thicknesses.
- Notching easily switches off for padding.
- Compact size with rugged construction for years of trouble-free operation and a lot of profits.

850 STANDARD EQUIPMENT:

- Manual Clamp
- Manual Nipping
- Notching
- Side Gluing Attachment
- 10 lbs. Glue
- 1-Tool Kit
- 1-Spare Parts Kit

AVAILABLE OPTIONS & ACCESSORIES:

- Vibrating Clamp Jogger
- Automatic Clamp
- Automatic Nipper
- Milling
- Glue (48 lbs. box)
- Fume/Chip Exhaust

Optional auto-nipping offers the most significant production time savings, while providing a square, tight book.

Optional milling smooths paper edge irregularities and allows you to bind complete signatures.

Optional auto-clamp reduces initial setup time. Optional vibrating clamp jogger minimized any sheet edge irregularities.

Optional fume/chip exhaust collects binding byproducts.
