

# ROSBACK COMPANY

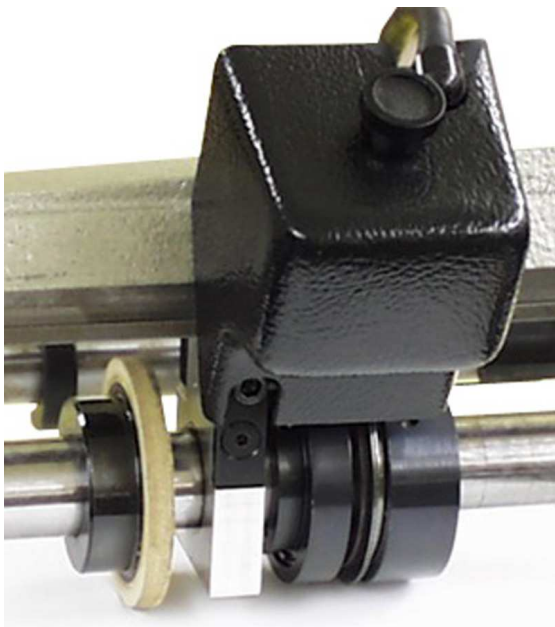

*Manufacturer of Quality Handcrafted Bindery & Finishing Equipment since 1881*

## **Cobra 4x4 'Strike' Perforating System**

The Rosback Cobra 4x4 Strike Perforating System offers versatility that no other system can match. Individual electronic control of each Strike Head allows a multitude of strike patterns with surface speeds up to 24,000 ft/hr. The Cobra 4x4 Strike System can run one to four lines of perf, slits or scores, each independently programmable for different strike patterns. Strike activities can be performed at the same time as regular perforating, slitting, scoring or micro perforating.

### **STRIKE PERFORATING SYSTEM FEATURES:**

- Easily, intuitive programming.
- Fast and accurate step-by-step adjustments in increments of 0.01" (0.25mm) (less than 1/64").
- Operate up to four Strike Heads with capability of four independent striking sequences.
- Utilizes standard Rosback slitting, perforating and micro-perforating blades.
- Surface speeds up to 24,000 ft/hr.
- Minimum line-to-line perforation is 2-3/4" (70mm).
- Strike Heads and other perf tooling are mounted onto the same cutter shaft. This feature enables strike perforating and other continuous perforating activities to operate simultaneously.
- *Cobra 4x4 Strike Head Systems can be upgraded or retro-fitted to work on these Rosback Perforators: 223 SRX, 226 SRX, 240, 240 XL, 243, 243 XL and 248 Perforators.*
- *An individual Cobra Strike Head can also be added to a Model 223 or 226 Vacuum Trueline*

Retro-Fit on 240/243/248 Series Perforators  
and on 223/226 Series Vacuum Truelines

Available on Models 223SRX, 226SRX, 240 XL, 243 XL & 248  
Perforators and on Models 223 and 226 Vacuum Truelines
