

ROSBACK COMPANY

Micro Perforation Heads

218 Bobcat

True-Line Series

240 and 240XL Series

True-Line SR Series

Rosback has been providing world class perforating, creasing, and slitting solutions since 1881. The TrueLine and 240XL series perforators provide quality, cost-effective perforating and creasing solutions that presses or folders cannot match. No wonder thousands of demanding print finishers ask for ROSBACK

Now add the Micro-Perforation Heads to your ROSBACK perforator/creaser. Rosback Micro-Perforation is designed to produce consistent miniature perforations into stock. A ream of micro perforated stock will remain flatter than slot-cut or knife-cut perforated stock. Choose from 36, 54, or 72 teeth to the inch.

EASY SETUP & OPERATION:

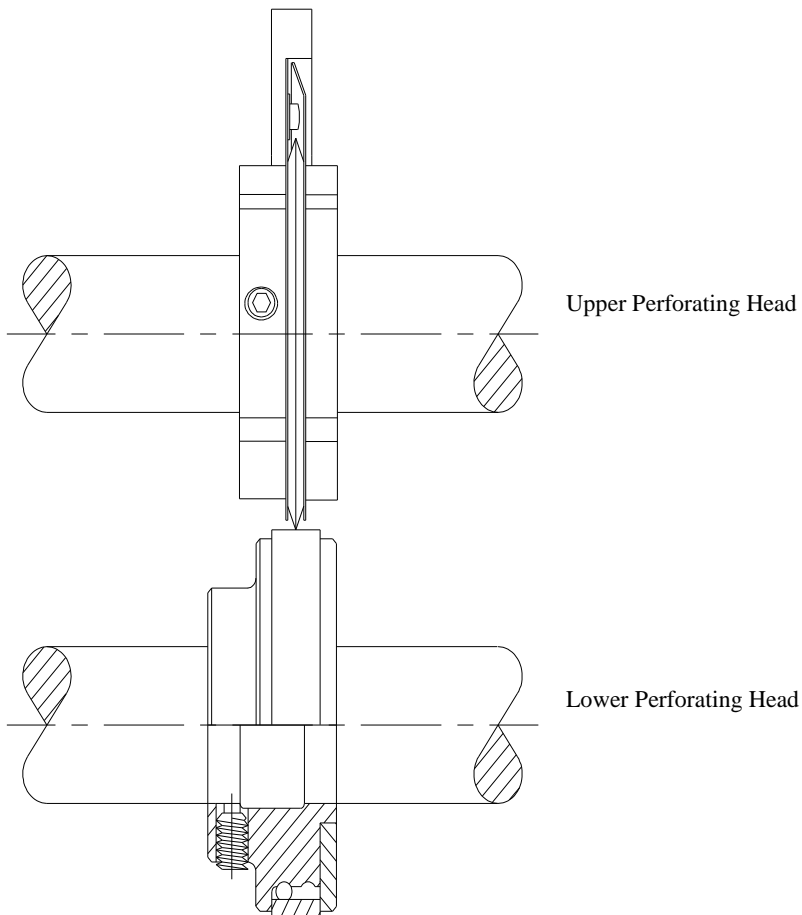

- Locate the upper head's line of perforation and lock into position.
- Position the lower head so that the perforation line is centrally located over the lower head's outer steel ring. Lock the lower head into position.
- Lower the upper head by rotating the pitch lever to #3 and place a sheet between the upper & lower heads.
- Lower the shaft in small increments while turning the hand wheel until a line appears on the sheet. Remove the sheet with the hand wheel and observe the perforation line.
- Check the perforation line for the desired depth. Lowering the upper shaft will create more pressure producing a deeper, more pronounced perforation line.

Micro Perforation Heads Available Kits:

220-A-118 36 TPI Kit
 220-A-110 54 TPI Kit
 220-A-111 72 TPI Kit
 -All kits include:
 220-A-075 –Burr Roller
 220-A-073 –Micro Perf Lower Head

OTHER AVAILABLE ACCESSORIES FOR ROSBACK PERFORATORS:

- TrueScore System. Eliminates cracking on all sensitive and delicate materials.
- Slot-Cut Heads. Produce a clean, highly visible and attractive line of perforation in 3 to 12 tpi.
- Knife-Cut Heads. Produce a clean, nearly invisible line of perforation in 3 to 12 tpi.
- Micro-Perf Heads. Very popular for refeeding printers. Produce a flat, strong perforation that leaves an exceptionally clean edge after separation. Available in 54 or 72 tpi.
- Slitting Heads. Cut multiple forms apart while you crease and slit.
- Scoring Heads. Many varieties in stock. Ask us if you have special needs.
- "CD" Inlay Heads. Produce finished CD inlay cards in single or multiple formats.
- Gutter Slit/Perf Heads. Slit apart multiple format jobs while ejecting the scrap strip away from the finished pieces.
- Pressure-Sensitive Slitting Attachment. Backslit or semi-slit labels and decals.
- Narrow Margin Perf Heads (3/8" From Sheet Edge)
- Special Slot-Perf Heads (1/2" Between Perf Lines)
- Special Engineered Heads. Let us know your needs. We have probably done it before and can produce your special application head quickly, saving you time and money.
