

# **ROSBACK COMPANY**

## **Saddle Stitcher Models 201CA and 201CB**

### **High Speed Saddle Stitching**

- High Production Speed at Low Cost
- Fast, Simple Changeover
- Heavy Duty Construction
- Engineered for Accuracy and Dependability

### Performance & Finishing Features

Designed for runs of hundreds and thousands... built for thousands of runs.

Rosback Model 201C Saddle Stitchers are incredibly fast and much more productive than pedestal stitchers, perfect for maximizing your efficiency and profitability.

Model 201C Saddle Stitchers offer two standard feeding stations. Add a Saddle Extension and expand to six stations as your needs increase.

These stitchers are built to provide years of trouble free service. Invest in the name trusted for over 120 years. ROSBACK.

### STATE-OF-THE-ART PERFORMANCE FEATURES:

Rugged long life construction

Conveniently located controls

Stagger and straight stitching

Variable speed drive

Movable footswitch

Missing Book Detector  
(201CB Models only)

Up to 4 stitching heads can be used simultaneously

Up to 6 feeding stations can be used simultaneously

### STANDARD EQUIPMENT:

2-Stitching Heads

2-Spools of Stitching Wire

1-Book Sensor (201CB only)

1-Tool Kit

1-Spare Parts Kit

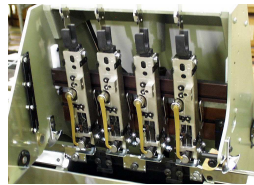

Conveniently located operator panel with large visible controls.

Two-station saddle provides four times greater productivity than pedestal stitchers.

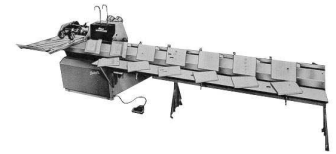

Missing book sensor on 201CB Models eliminates dropped stitches that can jam and break clinchers

Up to 4 stitching heads can be used at one time. Heads are easy to adjust, remove, or replace.

Positive delivery with single lever thickness adjustment of rollers assures positive book control throughout delivery.

Optional 213 Saddle Extension expands the saddle to six feed stations
