

SINGLE-CLAMP HOT-MELT PERFECT BINDER

860 DigiBinder and 870 DigiBinder Plus

ROSBACK

The 860 DigiBinder and 870 DigiBinder Plus set a new standard for on demand perfect binders. Both models feature fully automated set up. Create high quality perfect bound books and pads quickly and easily. Get excellent results on all types of paper, inks, and toners. Their innovative design makes them ideal for all types of printers and binderies.

Both DigiBinder models are completely self adjusting. Bind a thin book, then a thick book, without changing any settings. The pneumatic clamp and nipper are powered by a silent compressor and automatically adjust to the book thickness. The unique heavy duty blade roughs and notches the entire book spine, providing greater surface area for adhesion. Twin glue rollers apply an even layer of glue, while a third metering roller smooths out the glue to the desired thickness. The heavy duty nipper with adjustable pressure guarantees a perfectly square backed book or pad every time.

The 870 DigiBinder Plus includes a stand with casters and a safety cover. Heavier notching pins and a vacuum waste removal system provide maximum bind strength on difficult stock.

Bind one or two sample books, or a run of a thousand. Quality construction, ease of operation, and professional results make the DigiBinder and DigiBinder Plus a smart choice for any bindery.
